

Transmission Wizard™

Transferring loan information between trusted mortgage partners

A vendor-neutral data porting technology configured for your system

Transmission Wizard™ allows mortgage brokers to transfer data *seamlessly and securely* between a loan origination system (LOS) and various funding warehouses without expensive stand-alone programming.

Transmission Wizard™ delivers operational efficiencies by:

- Eliminating the need for **repeated data entry**
- Providing automatic **error checking** and notification
- Facilitating **extended loan cut-off times** and **earlier loan approvals** through expedited delivery
- **Migrating** data between a legacy system and a new LOS

Transmission Wizard™ is **LOS neutral**, compatible with any data loan origination software that includes an export component.

Transmission Wizard™ currently connects lending warehouses to:

- Calyx Software's Point®
- DataTrac®
- Genesis™, and
- ProLender Solutions, among others

Our team is committed to continually improving interoperability without impacting existing production processes

Contact us at: **1-877-4DIALECT** for more details.

Transmission Wizard™ is a legal trademark of DataDialect Solutions, Inc.; all other trademarks are the property of their respective owners.

DataDialect Delivers:

Fast Implementation Times—generally, less than 15 hours over 4 to 6 weeks for most installations.

Low Cost of Ownership—our clients have requested two pricing structures from license purchasing to monthly service fees. Contact us to discuss the best option for your firm.

Testimonial

"Before Transmission Wizard, our funders used to spend **30 minutes** per loan filling out forms, photocopying and faxing documents to our lender, to acquire funding on the day escrow would close. With Transmission Wizard, we are now able to transmit data for a batch of loans directly from our LOS system to the lender in approximately **5 minutes**."
